ClearOne Awarded New Patent relating to Audio Systems and IOT by the U.S. Patent and Trademark Office

SALT LAKE CITY, Dec. 12, 2017 /PRNewswire/ -- ClearOne (NASDAQ: CLRO), a global provider of audio and visual communication solutions, announced today that it has been awarded a new patent relating to smart audio systems and the Internet of Things (IOT).

The U.S. Patent and Trademark Office ("USPTO") issued United States Patent number 9,628,206 to ClearOne. This patent, entitled "Endpoint Parameter Management Architecture for Audio Mixers," among other things, enables audio mixers to configure and control smart, Internet-connected devices like microphones, speakers, amplifiers, and room sensors.

This new patent is part of ClearOne's growing patent portfolio that currently includes over 100 patents and pending patent applications covering multiple new technologies in the fields of audio and video processing, audio and video streaming, and innovative communication technologies. ClearOne's patents reinforce and protect its market leadership position, and demonstrate ClearOne's ongoing ability to develop cutting-edge products and technologies.

About ClearOne

ClearOne is a global company that designs, develops and sells conferencing, collaboration, streaming & signage solutions for voice and visual communications. The performance and simplicity of its advanced, comprehensive solutions offer unprecedented levels of functionality, reliability, and scalability.
