ClearOne Awarded New Patent for Video Synchronization by the U.S. Patent and Trademark Office

SALT LAKE CITY, Jan. 4, 2018 /PRNewswire/ -- ClearOne (NASDAQ: CLRO), a global provider of audio and visual communication solutions, announced today that it has been awarded a new patent relating to ClearOne's video streaming technology.

The U.S. Patent and Trademark Office ("USPTO") issued United States Patent number 9,807,408 to ClearOne. This patent, entitled, "A Control Mechanism for Video Output", enables, among other things, all of the video decoders playing back a stream of video to stay synchronized with the encoder, eliminating jerky, stuttering, video playback. This invention is used in the ClearOne VIEW[®] Pro D110 decoder, the ultimate solution in the market today for synchronized video streaming.

This new patent is part of ClearOne's growing patent portfolio that currently includes over 100 patents and pending patent applications covering multiple new technologies in the fields of audio and video processing, audio and video streaming, and innovative communication technologies. ClearOne's patents reinforce and protect its market leadership position, and demonstrate ClearOne's ongoing ability to develop cutting-edge technologies and products.

About ClearOne

ClearOne is a global company that designs, develops and sells conferencing, collaboration, streaming & signage solutions for voice and visual communications. The performance and simplicity of its advanced, comprehensive solutions offer unprecedented levels of functionality, reliability, and scalability.
