

ClearOne Introduces COLLABORATE® Space Enterprise, a New On-Premise Collaboration Platform

April 24, 2019

COLLABORATE Space Enterprise is the perfect solution for larger organizations that want all the benefits associated with a dedicated, on-premise collaboration server.

SALT LAKE CITY, April 24, 2019 (GLOBE NEWSWIRE) -- Once again underscoring its commitment to make unified communications and collaboration available to the widest possible range of users, [ClearOne](http://www.clearone.com) (NASDAQ:CLRO), a leading global provider of audio and visual communication solutions, today introduced **COLLABORATE Space Enterprise**, a new on-premise collaboration platform.

ClearOne's COLLABORATE® Space Enterprise, a new on-premise collaboration platform

“COLLABORATE Space Enterprise has all the functionality people have come to expect from a full-featured cloud collaboration app, with the increased security and full, enterprise control associated with on-premise platforms,” said Zee Hakimoglu, ClearOne Chair and CEO. “This new version of COLLABORATE Space addresses the unique requirements of larger organizations.”

In addition to the new, on-premise “Enterprise” platform, COLLABORATE Space is available in cloud-based “Basic” and “Pro” versions. All three COLLABORATE Space versions are powerful audio and video conferencing applications with a full suite of collaboration features. COLLABORATE Space includes everything for online meetings, including scheduling, messaging, integrated file sharing, whiteboarding, annotation, meeting minutes, and more. It unifies multiple users, via audio and video, with the ability to make calls to landlines and mobile phones.

Additionally, all three versions of COLLABORATE Space are exceptional collaboration platforms because users can create searchable, persistent private and public channels, organized by topic, which can include agendas, notes, messages, documents, whiteboards, audio and video recordings, and more.

COLLABORATE Space has a unique, user-friendly interface that’s intuitive and simple to use, and it runs on any device – mobile, desktop, and all ClearOne COLLABORATE Live room systems. Because it’s not designed as a “closed garden,” it includes gateway software for interoperability with traditional H.323 and SIP systems. Also, with “white label” options, COLLABORATE Space can be customized to match any partner or customer brand.

COLLABORATE Space Enterprise, like the Basic and Pro versions, is available now. Contact your ClearOne representative to learn what this new collaboration platform can do for you.

About ClearOne

ClearOne is a global market leader enabling conferencing, collaboration, and network streaming solutions. The performance and simplicity of its advanced, comprehensive solutions offer unprecedented levels of functionality, reliability, and scalability. Visit ClearOne at www.clearone.com.
