ClearOne DIALOG® UVHF Wireless Microphone System Named a Winner of the 2023 Pro AV Best in Market Award Program

October 10, 2023

Marking its second industry accolade, the DIALOG UVHF offers four types of microphones, Dante® audio streaming and simple installation to enable pro-level audio in any scenario.

SALT LAKE CITY, UTAH, October 10, 2023 — ClearOne, a global market leader in conferencing, collaboration, and network streaming solutions, today announced that its innovative DIALOG® UVHF wireless microphone system has been recognized as a winner in the 2023 AV Technology magazine Pro AV Best in Market award program.

ClearOne's DIALOG® UVHF has been honored as a winner in the 2023 AV Technology Pro AV Best in Market award program.

The Pro AV Best in Market award program celebrates excellence and innovation within the Pro AV industry by honoring standout solutions introduced over the past 12 months.

Debuted in June 2023, the ClearOne DIALOG UVHF wireless microphone system delivers class-leading flexibility, Power over Ethernet (PoE) simplicity, Dante technology and up to 350 usable frequencies to offer professional-quality audio conferencing, video collaboration and sound reinforcement for any size room.

"The innovation behind the DIALOG UVHF is a testament to ClearOne's commitment to delivering cutting-edge solutions that address the evolving needs of leading businesses and institutions," said Derek Graham, ClearOne's CEO. "The DIALOG UVHF stands unrivaled in its capacity to seamlessly adapt to diverse environments, all the while upholding exceptional audio quality, rendering it the ultimate choice for integrators, AV consultants, and end-users alike."

The DIALOG UVHF system addresses a wide range of audio pickup needs through five lavalier, lanyard and headset-type body microphones, two handheld microphones, a boundary microphone and three gooseneck microphones for podium use. Powering the microphones is simple and efficient, as all models use the same 12-hour off-the-shelf Li-ion battery that can be charged via USB-C or an optional eight-bay network-connected charging dock. Firmware updates can be done over the network, while the transmitters charge.

The Dante-enabled system includes an eight-channel Dante Access Point to ensure optimal signal transmission and system reliability, while an optional DIALOG UVHF Dante interface provides eight Euroblock balanced analog outputs, including mixed output, USB audio output and eight GPIOs. The lightweight plenum-rated access point provides versatile mounting options for wall, ceiling, tabletop, or pole mounting, including VESA mount holes.

The DIALOG UVHF stands out as the only system with a wireless access point that delivers antenna redundancy and diversity, with dual antennas providing spatial and polarization diversity that helps maintain high audio in harsh environments. ClearOne's free support for system design and remote commissioning makes the DIALOG UVHF that much more reliable – a seamless solution for any presentation space with a professional-quality multi-function audio pickup solution.

ClearOne's solutions are designed to support all leading collaboration platforms, including Microsoft Teams, Google Meet, GoToMeeting, Zoom and WebEx.
