ClearOne Announces the Addition of a 4-Channel Access Point and a 4-Bay Dock for its Award-Winning DIALOG® UVHF Wireless Microphone System

January 27, 2025

SALT LAKE CITY--(BUSINESS WIRE)--Jan. 27, 2025-- ClearOne, a global leader in conferencing, collaboration, and network streaming solutions, has announced the addition of a 4-channel Access Point and a 4-bay Dock to its award-winning DIALOG® UVHF Wireless Microphone System.

“We are excited to introduce these new additions to our DIALOG UVHF Wireless Microphone System,” said Derek Graham, CEO of ClearOne. “The 4-channel Access Point and 4-bay Dock offer significant benefits like lower cost, system flexibility and a smaller form factor for the dock. This translates to increased value for our customers, making our high-quality wireless audio solutions more accessible and a better fit for applications that require fewer microphones.”

With these new additions, the Dialog UVHF Wireless Microphone System now offers the flexibility to choose between an Access Point with 8 or 4 Dante channels and a Charger Dock capable of charging 8 or 4 microphones.

The lightweight plenum-rated access point provides versatile mounting options for wall, ceiling, tabletop, or pole mounting, including VESA mount holes. The Dante-powered system utilizes the Dante Access Point for optimal signal transmission and system flexibility. The DIALOG UVHF is the only system with a wireless access point delivering antenna redundancy and diversity, maintaining audio quality in harsh environments. A wired Ethernet connection enables connection with management software via web browsers.

The DIALOG® UVHF Wireless Microphone System combines class-leading flexibility, Power over Ethernet (PoE) simplicity, and Dante technology, offering up to 350 usable frequencies. An optional DIALOG UVHF Dante interface offers eight Euroblock balanced analog outputs, including mixed output, USB audio output, and eight GPIOs. This system provides professional-quality audio conferencing, video collaboration, and sound reinforcement for various applications and room types. Businesses and institutions benefit from a flexible wireless microphone system that addresses audio pickup needs for a wide variety of applications and rooms. With various microphone types available, including lavalier, lanyard, and headset-type bodypack microphones, the DIALOG UVHF provides unmatched flexibility for integrators, room designers, and meeting hosts. The DIALOG UVHF provides an ideal experience for hybrid and in-person conferencing, video collaboration, and voice lift in various settings.

Standard to ClearOne solutions, the DIALOG UVHF supports all leading collaboration platforms, including Microsoft Teams®, Google Meet®, Zoom®, and WebEx®, ensuring seamless connectivity for in-person and hybrid users regardless of their personal system, ensuring meeting equity.

The Dialog® UVHF Wireless Microphone System is backed by a three-year warranty.
