## ClearOne Expands Collaboration Options with New Ceiling Microphone

SALT LAKE CITY, June 13, 2011 /PRNewswire/ -- ClearOne (NASDAQ: CLRO), a global communications and entertainment solutions company, announced it is expanding its line of audio and teleconferencing microphones with its first model designed expressly for ceiling installation. Conceived for group meeting environments not suited for tabletop solutions, the new model is a high performance, three-element microphone which minimizes ambient noise from ceiling sources while delivering full 360-degree coverage. The ClearOne ceiling microphone features an adjustable length of Plenum-rated cable for drop ceilings.

Available in black or white, the microphone will be introduced this week in Orlando at InfoComm (booth 1563), the largest trade show for designer and installers of professional AV systems.

"The new ClearOne ceiling microphone will provide more installation options for end-users and create new opportunities for our integrators," said Aaron Davis, Senior Director of Product Marketing. "The new models enable installers to put together individual, custom solutions to transmit optimized audio."

The new ceiling microphone takes advantage of ClearOne HDConference™ technology. It employs an auto-mixer circuit, providing adaptive ambient response with first microphone priority. Cable connections are via an RJ45 jack and Cat 5/6/7 cable.

The new microphone is scheduled for shipment in September at an MSRP of \$599.

### About ClearOne

ClearOne is a global communications solutions company that develops and sells conferencing, collaboration, multi-media streaming and connectivity systems for audio, video, and web applications. The reliability, flexibility and performance of our advanced comprehensive solutions enhance the quality of life through better communication, education, and entertainment.

We develop, manufacture, market, and service a comprehensive line of high-quality audio conferencing products under personal, tabletop, premium and professional categories. We occupy the number one position in the global professional audio conferencing market with nearly 50% of the global market share. Our conferencing solutions save organizations time and money by creating a natural environment for collaboration.

NetStreams, a ClearOne brand of residential products, delivers the ultimate IP A/V experience by distributing high definition audio and video over TCP/IP networks. NetStreams' products, designed for commercial and residential use, offer unprecedented levels of performance, functionality, simplicity, reliability, and expandability. By combining audio/video content, meta-data and control signals into one stream and incorporating industry standards, NetStreams' newly patented StreamNet® solutions are a smart investment, enabling the Power of AV over IP™ today.

NetStreams' StreamNet technology provides elegant solutions for streaming media & control applications such as digital signage, distribution of HD video and audio, LAN Cloud Matrix Switching™, and audio paging over data networks.
