ClearOne extends Microsoft Communicator to Large Group Conference Rooms with the Introduction of New Product

NEW - INTERACT AT-OC is fully certified for Microsoft Communication Server and its HD Video Conferencing capabilities.

SALT LAKE CITY, UTAH, July 8, 2010 — ClearOne (<http://www.clearone.com>) (NASDAQ:CLRO), a global communications solutions company that develops and sells conferencing, collaboration, streaming media, and connectivity systems for audio, video and web applications, announced today that INTERACT™ AOC is the first and only solution certified for Microsoft Communications Server that is capable of providing HD quality audio conferencing for large group conferencing environments (up to 15 people). Simply plug INTERACT AT-OC into any PC USB port and bring the rich collaboration of Communication Server video, voice, and data sharing into the conference room. The Microsoft Communicator client, used in conjunction with INTERACT AT-OC, bypasses the complicated routine and dialing sequences of setting up a video or teleconference. Finally, connect and collaborate in the large conference room as easily as you do on your desktop. INTERACT AT-OC takes care of the rest by creating an immersed audio experience in the conferencing room.

"The INTERACT AT-OC uniquely maximizes the collaboration features of the Microsoft Collaboration Server and extends the reach of this ecosystem to any group environment," said Darrin Thurston, Vice President of Product Management for Conferencing & Collaboration products at ClearOne. "Paired with Communication Server "14", group conferencing becomes a truly unified experience combining HD audio and video with Microsoft's full application suite." Thurston continued, "By simply combining a PC, display, and USB camera with the INTERACT AT-OC you can create an affordable video conferencing solution for the group room at a fraction of the cost of traditional systems."

The INTERACT AT-OC will be available for shipment on July 11, 2010. MSRP of the solution is \$3,375. It will be shown at the Microsoft Worldwide Partner Conference in the ClearOne booth on July 11-15, 2010, in Washington, D.C.. Contact ClearOne Sales at 1-800-707-6994 for further information.

About ClearOne

ClearOne is a global communications solutions company that develops and sells conferencing, collaboration, streaming media and connectivity systems for audio, video, and web applications. The reliability, flexibility and performance of our advanced comprehensive solutions enhance the quality of life through better communication, education, and entertainment.

We develop, manufacture, market, and service a comprehensive line of high-quality audio conferencing products under personal, tabletop, premium and professional (installed audio) categories. We occupy the number one position in the global professional audio conferencing market with more than 50% of the global market share. Our conferencing solutions save organizations time and money by creating a natural environment for collaboration.

NetStreams, recently acquired by ClearOne, delivers the ultimate IP A/V experience by distributing high definition audio and video over TCP/IP networks. NetStreams' products, designed for commercial and residential use, offer unprecedented levels of performance, functionality, simplicity, reliability, and expandability. By combining audio/video content, meta-data and control signals into one stream and incorporating industry standards, NetStreams' newly patented StreamNet® solutions are a smart investment, enabling the Power of AV over IP™ today.

NetStreams' StreamNet technology provides elegant solutions for streaming media & control applications such as digital signage, distribution of HD video and audio, LAN Cloud Matrix Switching™, and audio paging over data networks.
