ClearOne Launches New Unified Communications Solutions at IBM Lotusphere 2011 ClearOne's IBM Lotus Sametime compatible solutions enable users to experience high quality, hands free audio with plug and play ease.

SALT LAKE CITY, Jan. 27, 2011 /PRNewswire/ -- ClearOne® (<http://www.clearone.com>) (Nasdaq: CLRO), a global communications and entertainment solutions company, will showcase new products in their booth at the upcoming IBM® Lotusphere 2011, Sunday, January 30 through Thursday, February 3. ClearOne will showcase its broad portfolio of award winning IBM® Lotus® Sametime™ compatible products designed to enhance the user's Unified Communications experience at Pedestal #803 in the Product Showcase at the Walt Disney World® Swan and Dolphin Resort in Orlando, Florida.

ClearOne's IBM Lotus Sametime compatible portfolio includes the following solutions:

CHAT® 50 – The CHAT 50 is a personal speakerphone that connects to PCs and laptops enables with Unified Communications for rich, full-duplex audio. With HDConference® audio technologies, the CHAT 50 is the perfect audio peripheral for greatly enhanced collaboration.

CHAT® 150 – A speakerphone for small group use, the CHAT 150 connects to PCs and laptops for rich, full-duplex audio communication. The CHAT 150 is the perfect addition to the executive office or conference room for a greatly enhanced Unified Communications audio experience.

CHATAttach™ 150 Unified Communications conference calls are no longer limited to small tables. The CHATAttach 150 facilitates USB conferencing for medium and large conference rooms. The CHATAttach conferencing system, which includes two CHAT 150s, enables even distribution of microphones and loudspeakers. Mute and volume controls are available at each pod or through the Unified Communications PC interface.

INTERACT™ AT A complete Unified Communications conference room solution with flexibility in mind. The INTERACT AT delivers exceptional audio quality at an affordable price and includes all the necessary audio equipment and peripherals providing state of the art quality and intelligibility.

"Visitors to our IBM Lotusphere booth will see how our innovative Unified Communications solutions continue to position ClearOne ahead of the competition," said Chris Wildfoerster, Vice President Business Development of ClearOne. Wildfoerster continued, "IBM Lotus Sametime partners will experience innovative solutions that reach deeper into the enterprise infrastructure and offer clear and differentiated value to both the systems integrator and their client."

About ClearOne

ClearOne is a global communications solutions company that develops and sells conferencing, collaboration, streaming media and connectivity systems for audio, video, and web applications. The reliability, flexibility and performance of our advanced comprehensive solutions enhance the quality of life through better communication, education, and entertainment.

We develop, manufacture, market, and service a comprehensive line of high-quality audio conferencing products under personal, tabletop, premium and professional categories. We occupy the number one position in the global professional audio conferencing market with nearly 50% of the global market share. Our conferencing solutions save organizations time and money by creating a natural environment for collaboration.

NetStreams, a ClearOne brand of residential products, delivers the ultimate IP A/V experience by distributing high definition audio and video over TCP/IP networks. NetStreams' products, designed for commercial and residential use, offer unprecedented levels of performance, functionality, simplicity, reliability, and expandability. By combining audio/video content, meta-data and control signals into one stream and incorporating industry standards, NetStreams' newly patented StreamNet® solutions are a smart investment, enabling the Power of AV over IP™ today.

NetStreams' StreamNet technology provides elegant solutions for streaming media & control applications such as digital signage, distribution of HD video and audio, LAN Cloud Matrix Switching™, and audio paging over data networks.
