ClearOne Brings Affordable Wireless Controller for INTERACT AT and INTERACT Pro Audio Conferencing Solutions

SALT LAKE CITY, Nov. 16, 2010 /PRNewswire/ -- ClearOne® (<http://www.clearone.com>) (Nasdaq: CLRO), a global communications and entertainment solutions company that develops and sells conferencing, collaboration, streaming media, and connectivity systems for audio, video and web applications, today announced the availability of the INTERACT™ Wireless Controller for the INTERACT product line. The new offering gives INTERACT users the ability to easily establish and manage an audio conference wirelessly from an intuitive telephone-like controller. The radio link is based on 2.4GHZ Direct-Sequence Spread Spectrum (DSSS) making it a robust solution against interference in any enterprise environment. The Wireless Controller consists of a tabletop dialer and a base station. The wireless tabletop dialer incorporates a tactile dial pad, room audio control keys, and an LCD creating a familiar user experience similar to an office telephone. The wireless base station connects to either the INTERACT AT or INTERACT Pro audio conferencing mixers.

"The addition of a wireless controller allows users to control their audio conferencing system from anywhere within the conference room without cumbersome or unsightly wires," said Darrin Thurston, Vice President of Product Management, Conferencing & Collaboration for ClearOne. "Users now have the benefit of wireless control for the INTERACT AT a fraction of the expense and complexity of a custom control system."

The INTERACT Wireless Controller is available now and can be purchased separately or as part of a complete bundled room solution. Contact ClearOne Sales at 800-707-6994 for more information.

About ClearOne

ClearOne is a global communications solutions company that develops and sells conferencing, collaboration, streaming media and connectivity systems for audio, video, and web applications. The reliability, flexibility and performance of our advanced comprehensive solutions enhance the quality of life through better communication, education, and entertainment.

NetStreams, recently acquired by ClearOne, delivers the ultimate IP A/V experience by distributing high definition audio and video over TCP/IP networks. NetStreams' products offer unprecedented levels of performance, functionality, simplicity, reliability, and expandability. By combining audio/video content, meta-data and control signals into one stream incorporating industry standards, NetStreams' newly patented StreamNet® solutions are a smart investment, enabling the Power of AV over IP™ today.

NetStreams' StreamNet technology provides elegant solutions for streaming media & control applications such as digital signage, distribution of HD video and audio, LAN Cloud Matrix Switching™, and audio paging over data networks.
