ClearOne Introduces Enhanced Collaborate™ with Multimedia Streaming Capability Collaborate enriches the audio and visual experience of unified communications and popular web conferencing services in the group room or executive office

SALT LAKE CITY, June 8, 2011 /PRNewswire/ -- ClearOne (NASDAQ: CLRO), a global communications and entertainment solutions company, announced it will demonstrate Collaborate™, an all-in-one voice, video, and data collaboration solution, next week in Orlando at InfoComm 2011, America's largest trade show for business A/V and presentation technologies. Designed for organizations using unified communications software or popular web conferencing services, Collaborate delivers true plug-and-play simplicity and allows small groups in an executive office or conference room to converse and interact with each other while simultaneously viewing data from applications, web sites, or other local or network sources.

Collaborate, originally announced in March, will be available for the first time with VIEW™ Media Receiver, an optional software application utilizing StreamNet™ technology. VIEW™ Media Receiver allows Collaborate users to consume rich, high definition multimedia content from anywhere on the enterprise network in the form of live media broadcasts, corporate presentations, on-demand videos, real-time dashboards, digital signage, etc. This versatile software decoder can be used in conjunction with any VIEW™ encoder to provide complete control of and unlimited access to content from varied sources such as Blu-ray players, satellite receivers, cable boxes, DVRs, cameras, personal computers or media servers.

"Collaborate, now enhanced with StreamNet technology, demonstrates the power of our integrated offering," said Zee Hakimoglu, President, Chief Executive Officer and Chairman of ClearOne. "We believe this is only the beginning of what we see as the unleashing of the Power of AV over IP to bring about transformative solutions resulting in higher productivity and value for the enterprise."

Collaborate, scheduled for shipment later this month, is available in four mounting options: wall mount, foot stand, media stand or a media cart. Pricing starts at \$10,249 MSRP, and will vary dependent on selected configuration and options.

VIEW Media Receiver will be available in September 2011 with a single-seat license priced at \$999.

About ClearOne

ClearOne is a global communications solutions company that develops and sells conferencing, collaboration, multi-media streaming and connectivity systems for audio, video, and web applications. The reliability, flexibility and performance of our advanced comprehensive solutions enhance the quality of life through better communication, education, and entertainment.

We develop, manufacture, market, and service a comprehensive line of high-quality audio conferencing products under personal, tabletop, premium and professional categories. We occupy the number one position in the global professional audio conferencing market with nearly 50% of the global market share. Our conferencing solutions save organizations time and money by creating a natural environment for collaboration.

NetStreams®, a ClearOne brand of residential products, delivers the ultimate IP A/V experience by distributing high definition audio and video over TCP/IP networks. NetStreams' products, designed for commercial and residential use, offer unprecedented levels of performance, functionality, simplicity, reliability, and expandability. By combining audio/video content, meta-data and control signals into one stream and incorporating industry standards, NetStreams' newly patented StreamNet® solutions are a smart investment, enabling the Power of AV over IP™ today.

NetStreams' StreamNet technology provides elegant solutions for streaming media & control applications such as digital signage, distribution of HD video and audio, LAN Cloud Matrix Switching™, and audio paging over data networks.
