ClearOne Adds New Entry-Level Audio-Video Decoder To its Suite of Network Media Streaming Solutions

VIEW® Pro D310 Decoder Delivers Scalable Flexible, Price-to-Performance Value

SALT LAKE CITY, May 31, 2016 /PRNewswire/ -- **ClearOne's** [NASDAQ: CLRO] innovative new entry-level VIEW Pro D310 Decoder features all the basic functionality to fully satisfy simple applications while delivering superb price-to-performance value as the latest addition to ClearOne's industry-leading VIEW® Pro network media streaming components.

"For simple display of single-image video applications, the D310 is the right solution at the right price," ClearOne Sales Director, Network Video & Audio Streaming, North & Central America, Lewis Eig said. "For installations requiring video walls, video composition, audio mixing, RTSP stream support, or other advanced features, we offer more advanced decoders."

The D310 Decoder features convenience in its small footprint and easy mounting behind any display. It delivers full-screen, single-image video; high-quality video with 4:2:0 video color sampling; and 1080p60, H.264-based high-profile decoding with lossless compression.

"Proprietary cabling has limitations, so we have eliminated the cabling, along with the need for costly hardware matrix switching," Eig said. "In its place, we have streaming multimedia conveyed over TCP/IP. The contrast is dramatic, with users experiencing huge improvements in flexibility, scalability, price, and performance vs. traditional AV streaming and distribution methods."

Eig noted that the VIEW Pro D310 Decoder is fully compatible with all VIEW Pro encoders and decoders, and configurable with ClearOne's new VIEW CONSOLE® software. It also offers source-selection and control software for Windows®, Mac, Android™, and iOS devices.

ClearOne's VIEW platform can scale to any venue size, from light commercial to the largest, most complex settings. VIEW AV encoders, decoders, amplifiers, and Ethernet switches provide full flexibility and scalability for networked audio and video — which, Eig said, "is a perfect match for AV environments ranging from corporate communications and hospitality and entertainment to education, healthcare, houses of worship, digital signage, and more."
