CLEARONE ANNOUNCES ADDITIONS TO POPULAR CONFERENCING FURNITURE LINE

Two new wood plasma carts offer affordable alternatives

SALT LAKE CITY, July 26, 2007 – ClearOne (OTC: CLRO.OB), the leading provider of high performance audio conferencing solutions, today announced that it has added two new products to its line of conferencing furniture. The new products are a wood versions of its popular Titan™ Plasma Carts and offer an attractive, durable solution for mounting single or dual plasma displays, at a significant cost savings compared to the popular Titan metal plasma carts.

Each piece of ClearOne's conferencing furniture is designed to be highly durable and functional, while also providing the style and elegance required for the most sophisticated settings. ClearOne's plasma carts are designed to provide superior support for plasma monitors. Like their metal counterparts, the wood versions of these carts are reinforced for extreme balance and smooth movement, making them easy to transport from room to room.

The two new products are:

- + Wood Series Single Plasma Cart – with rack rail (#911-171-002)
- + Wood Series Dual Plasma Cart – with rack rail (#911-171-003)

ClearOne's plasma carts allow custom positioning of plasma monitors to ensure optimal viewing from any seat in the meeting room. The adjustable codec shelf provides convenient placement of any set-top codec, and the camera shelf places the PTZ camera at eye level for more natural interactions (the PTZ shelf is included with the dual cart only). The Single Plasma Cart can support a single plasma monitor up to 60¾" wide by 39½" high. The Dual Plasma Cart can support two plasma monitors with those same dimensions.

These plasma carts provide many extras that facilitate product installation, including a removable vented back panel with a cable management duct. The 9-space rack with 22" depth and the 2" rack-rail recess behind the door ensure adequate space for equipment, and the 7½" shelf with removable vented front panel is ideal for holding a center-channel speaker or VCR/DVD player. With precision-synthetic, double ball bearing casters and 5½" clearance, the carts are extremely easy to maneuver from room to room.

"ClearOne is well known for providing high performance audio conferencing solutions," said Scott Woolley, Product Marketing Director, Professional Audio Products at ClearOne. "But there may be some who are not aware that we also offer an impressive line of conferencing furniture. These two new products provide tremendous value at an affordable price while still delivering great mobility and durability."
