## **ClearOne Chat 150 Receives Communications Solutions 2006 Product of the Year Award from TMC**

### **Latest ClearOne Speaker Phone Peripheral Recognized for Delivering Innovative Audio Conferencing Solutions**

[ClearOne](#) (OTC: CLRO.OB), the

global provider of audio conferencing products, today announced its [Chat™](#)

[150](#) speaker phone peripheral has received the Communications

Solutions 2006 Product of the Year Award from Technology Marketing

Corporation (TMC).

TMC noted the Chat 150's unique capability to

connect to select enterprise telephone handsets, including ClearOne's

recent announcement about new connectivity to Cisco 7940, 7960, and 7970

phones. The Chat 150 also connects to Avaya 2400, 4600, and 9600 series

telephone models. It allows users to take full advantage of all of the

features available on their enterprise phones, such as company directory

lookup and access to audio bridge functions, and transforms these

handsets into high-performance conference phones without the need to add

another line and pull cable into the room.

TMC also noted the Chat 150's ease of

installation, ease of use, and excellent audio performance including

full-duplex, 360-degree pickup, and automatic level management.

Each year, editors at TMC (publisher of several print publications

including Internet Telephony Magazine) bestow Communications Solutions

Product of the Year awards on companies that have demonstrated vision,

leadership, and attention to detail.

"The winning companies have demonstrated a

commitment to quality and the further development of the communications

industry through their products or services," said Patrick Barnard, head of TMCnet's judging committee. "High honors are deserving of these winners. My congratulations to them and I look forward to seeing more innovative solutions from them as they continue to contribute to the future of the communications industry."

The Chat 150 is available in four versions:

- Chat 150 USB – for PC conferencing applications
- Chat 150 VC – connects to video conferencing systems
- Chat 150 Avaya – connects to Avaya 2400, 4600, and 9600 series phones
- Chat 150 Cisco – connects to Cisco 7940, 7960, and 7970 phones

These products are available at leading telephony channel dealers and online direct marketing resellers in the U.S., and also in many international markets. Click on <http://www.clearone.com/products/buy.php> for additional details on where to buy this product.
